

COMFORT & SAFETY

 **BAGEN**[®]

OE Official Supplier

A word from our President. With an international presence in Europe and Turkey, Bagen is a leader in Automotive Steering & Suspension Parts, as well as Air tanks, and a major quality partner for heavy truck (HCV), busses, business machines (CV) producers. Bagen is also a focused supplier for OE and aftermarket. It is our sincere desire to achieve further development and growth by pursuing innovative changes in the industry. Bagen philosophy is corresponding to the needs of the automotive market through perfection in Quality and Services. Bagen; independent, privately-owned, family company. Our culture is far removed from any short-term logic and is very much about building solid relationships over the years with our partners all over the world within the automotive sector. This has been possible because of our relentless commitment to work closely not only to understand the key strategic goals and single business models of our clients, but also that subtle match between the talent that we look to attract and our clients' unique organizational DNA. Bagen products are well-reputed in the global market. We live in the age of globalization and today there is no possible success without international development based on products quality and efficient customers service. Bagen is utilizing every aspect of accumulated knowhow and technologies developed through persistent research of improvement. It is also our philosophy of business to contribute to our society as in addition to providing forefront technologies, we are also focusing on "environmental and safety issues". We seek to continuously educate ourselves towards further perfection. VDA 6.3 process certification in 02 2019 was only a little step further, together with our clients and partners, we deliver results. Some people say that innovation, quality and customer service are a challenge. We say, it is what we do well. As always, we appreciate your continuous support for our activity and together we are ready to build the future. Nothing is impossible!

BEST IN QUALITY

Bagen company took a strong and firm step together with its 150 employees to achieve its targeted motto of "Safe and Comfortable Drive" experience.

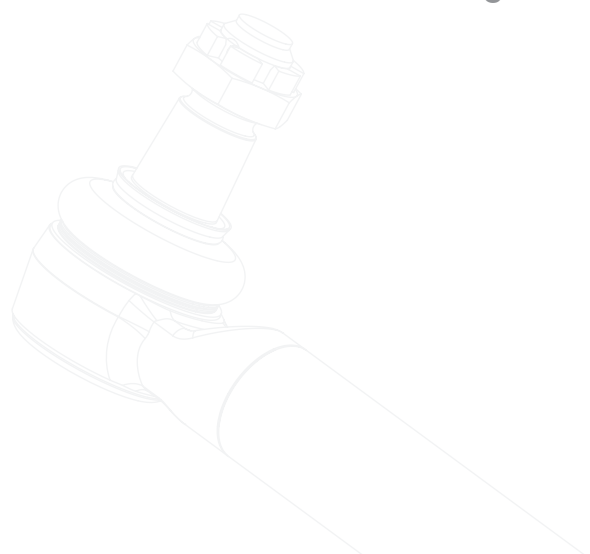

The greatest challenge in modern, technically complex vehicles is the balance between performance, economy and environmental compatibility.

Steering & Suspension Parts are often subjected to extreme loads, degraded road quality, which accordingly increases the quality requirements of those parts.

For this reason, Bagen. only and exclusively offers steering and suspension parts in a tested and OE matching quality. The assortment includes a wide range of safety-relevant steering and suspension components that contributes to your safety.

Behind each truck and buses service networks, big or small, are end users with the same legitimate aspiration for Safety, Reliability and Quality. BAGEN is delighted to serve a fast-growing base of regional customers through our 70 worldwide partnership. Business is a human adventure and our story with our partners is a great one.

ANALYSIS

SMART FACTORY

BAGEN smart factory is a digitised manufacturing facility that uses connected devices, machinery and production systems to continuously collect and share data. This data is then used to inform decisions to improve processes as well as address any issues that may arise.

The smart manufacturing practices used by BAGEN are enabled by a variety of technologies including artificial intelligence (AI), big data analytics, cloud computing, and the industrial Internet of Things (IIoT).

BAGEN Smart factories connect the digital and physical worlds in order to monitor an entire production process, from supply chain management to manufacturing tools and even the work of individual operators on the shop floor.

Fully integrated, BAGEN collaborative manufacturing systems provide a range of benefits for operators, including allowing operations to be adaptable and readily optimised.

BAGEN Smart factories use connected equipment and devices to allow for evidence-based decision-making to optimise efficiency and productivity throughout the manufacturing process.

By delivering an agile, iterative production process extend the capabilities of both devices and employees, leading to lower costs, reduced downtimes and less waste in the manufacturing process.

SUSTAINABILITY

Company Compliance

BAGEN has gained recognition and trust of its customers thanks to its responsible corporate management, compliance, its outstanding products and services.

Compliance is an essential element in ensuring the long-term success of the business, protects employees from unnecessary risks, and highlights the right way where doubt arises.

Our Guiding Principles

Corporate management based on integrity, and assumption of social responsibility form the principles of BAGEN policy.

Code of Conduct

Business partner Principle

How BAGEN Thinks and Acts Sustainably : Clear targets, concrete action

BAGEN has identified targets to which the company is able to make a relevant contribution. This means either through minimizing consequences or by developing new technical solutions with positive effects. Our focus is on Climate and Nature, People and Enduring Values.

Climate and Nature

Emissions reduction throughout the supply chain

Use and production of electricity from renewable sources

People

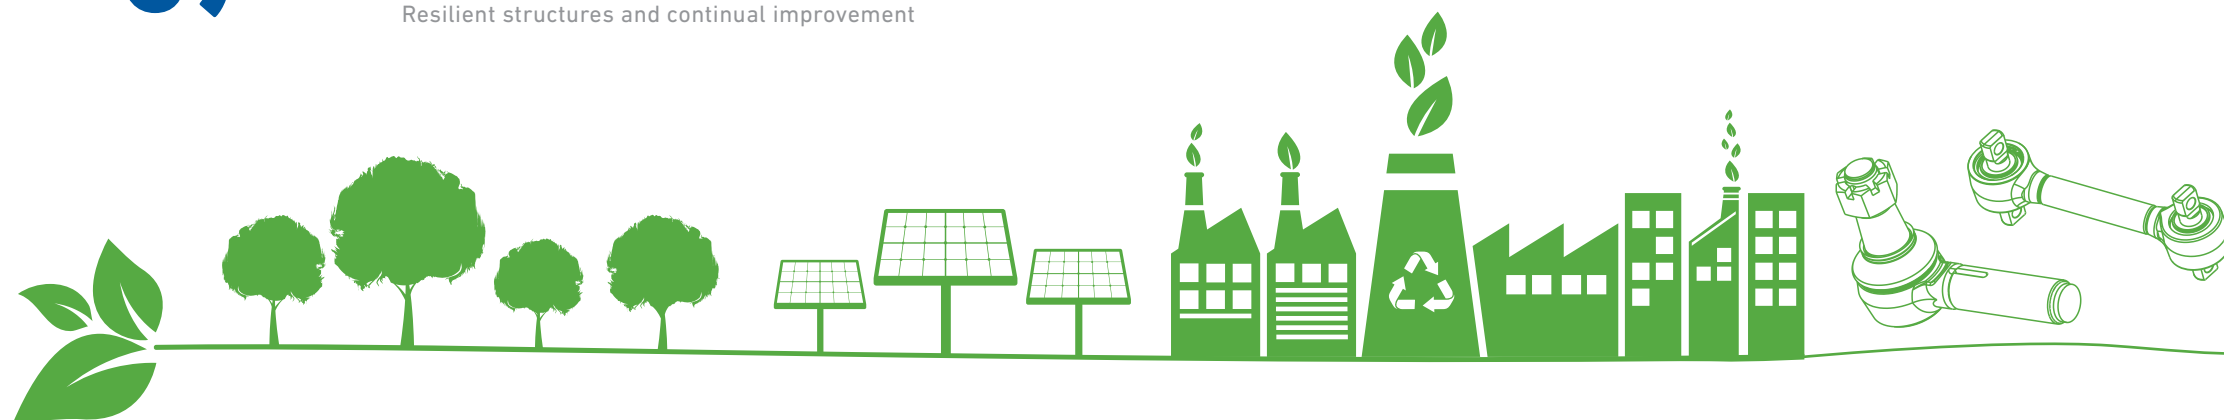

Responsibility for the BAGEN community

The very highest standards of health, wellbeing and safety at work

Lasting Values

Enduring values through the pursuit of sustainability

Resilient structures and continual improvement
